Education

- **Saint-Petersburg State University** — Saint-Petersburg, Russia
  Bachelor of Software Engineering — *Sept. 2020 - May 2024*
  - **Courses**: Operating Systems, Human-Computer Interaction, Software Development, Algorithms and Complexity, Introduction to Software Engineering, Computational Mathematics, Computer Workshop, Algorithms and Data Structures, Introduction to Programming

Projects

- **Grading system**
  https://github.com/Pupsen-Vupsen — *Dec. 2021 - Current*
  - In team built testing system which allows checking robotics tasks in a competition format
  - Held the regional stage of the Technology Olympiad in St. Petersburg on this platform
  - **Technologies**: Kotlin (SpringBoot, JUnit, Mockito), Git, GitHub, Docker, Docker Compose
  - **Keywords**: Robotics, TRIK Studio, Restful-service
- **Mini Solidity Interpreter**
  https://github.com/5h15h4k1n9/MSI — *Dec. 2022 - Current*
  - Building application which allows interpreting subset of Solidity language and running it in interactive mode
  - **Technologies**: Haskell (HSpec, Parsec), Git, GitHub
  - **Keywords**: Interpreter, Parser
- **Graph analyzer**
  https://github.com/spbu-team-11/graph-analyzer-app — *May 2021*
  - In team built application which allows highlighting communities in graphs, finding vertices centrality and making layout of the graphs
  - **Technologies**: Kotlin (JUnit, TornadoFX), Git, GitHub
  - **Keywords**: Graph community detection, Layout graph

Courses

- **Algorithms: Theory and Practice. Data Structures**
  Computer Science Center — *Feb. 2021*
- **Algorithms: Theory and Practice. Methods**
  Computer Science Center — *Feb. 2021*
- **Computer Architecture**
  Princeton University — *Feb. 2021*
- **Functional Programming on Haskell**
  Computer Science Center — *July 2022*

Experience

- **UniChance** — Saint-Petersburg, Russia
  Teacher — *Nov. 2021 - Jan. 2023*
  - Teaching mathematics and computer science (grades 5 - 11)
  - Development of curricula and teaching materials

Programming Skills

- **Languages**: Kotlin (SpringBoot, JUnit, Mockito), Python, Haskell (HSpec, Parsec)
- **Technologies**: Git, GitHub Actions, Docker, Docker Compose, SQL
